

SERVICES

FUEL FILTER SERVICE Starting at \$49.99

A fuel filter is an essential part of protecting your vehicle's engine from harmful contaminants. A dirty fuel filter will restrict the flow of fuel which leads to poor acceleration, reduced fuel economy and reduced engine performance. A clean fuel filter is one of the best ways to improve fuel economy, increase performance and extend the life of your engine.

- Should be serviced according to manufacturer's recommended mileage interval
- The old fuel filter is removed
- The new fuel filter is installed according to manufacturer's specifications
- Your vehicle is started to build up pressure in your fuel system so that we can check for leaks

AIR FILTRATION SERVICE Starting at \$19.99

The air filter is made of a paper element that reduces harmful dirt particles from entering the engine where they can do damage. The dirtier the air filter, the more the airflow to the engine is restricted. This leads to poor acceleration, reduced engine performance and lastly, reduced fuel economy (MPG).

- Recommended as needed
- The old air filter is removed
- All excess dirt and debris is removed from your air filter housing
- The new air filter is installed

CABIN AIR FILTER SERVICE Starting at \$29.99

The cabin air filter in your vehicle works the same as the furnace filter in your home. It removes all kinds of pollen, dust, soot and odors that enter your vehicle. Cabin filters are particularly beneficial for people with allergies as they do an effective job of removing allergens from the air. A clean cabin air filter will just let you breathe easier!

- Recommended as needed
- The old cabin air filter is removed
- All excess dirt and debris is removed from your cabin air filter housing.
- The new cabin air filter is installed.

POWER STEERING FLUSH \$79.99

Power Steering fluid lubricates for all of the moving parts throughout the power steering system. This will prevent parts from wearing out and failing by removing metal debris which accumulates in the old fluid and conditions the o-rings and seals. It will also quiet down noise caused by contaminated fluid.

- 100% of your existing fluid, dirt and contaminants are flushed from your power steering system.
- Your power steering system is refilled with a premium fluid that meets or exceeds your manufacturer's specifications.
- The conditioners revitalize all o-rings and seals throughout the system.

RADIATOR FLUSH \$79.99

Anti-freeze/Coolant lowers the freezing point and raises the boiling point of water. It circulates through the engine absorbing the excess heat, preventing rust/corrosion from forming on internal parts and lubricates the water pump. If anti-freeze/coolant is not replaced, rust will corrode the metal parts of the cooling system and lead to expensive repairs to the radiator and the water pump.

- Should be serviced according to manufacturer's recommended mileage interval
- Existing fluid, dirt and contaminants are evacuated from your cooling system
- Your cooling system is refilled with the required 50/50 mix of premium anti-freeze and water

BRAKES PAD REPLACEMENT Starting at \$99.99

There is more to your brakes than just pads and rotors. Mobil 1 Lube Express technicians know every part of your brake system inside and out. Remember, regular brake inspections should be part of your vehicle's ongoing maintenance, helping to ensure its safety and reliability. We recommend yearly brake inspections for your family's safety.

Front Brake Service

Replace Front Brake Pads
Resurface Rotors
Pack Front Wheel Bearings
Inspect Brake Lines
Inspect Park Brake Cable and Hardware
Inspect Master Cylinder
Bleed Brake System and
Top Off Brake Fluid

Rear Brake Service

Replace Rear Brake Lining
Inspect Brake Lines
Inspect Master Cylinder
Resurface Rotors/Drums
Inspect Brake Hoses
Bleed Brake System and Top Off Brake Fluid

BRAKE FLUSH \$89.95

Brake Fluid is a special oil that has specific properties. It is designed to withstand cold temperatures without thickening as well as very high temperatures without boiling. Old oxidized, contaminated fluid or air pockets can cause brake failure or sponginess feeling to your brakes.

- Your existing contaminated or old fluid will be drained and flushed from your brake lines & master cylinder
- All existing moisture, condensation and air is removed from the brake system
- The master cylinder, brake lines and reservoir are refilled with DOT4 High-Temp. Brake fluid

TIRE ROTATION \$14.99

Tire Rotations help to make your tires last longer by reducing uneven wear. Driving style, wheel alignment, amount of miles driven and tire location on the vehicle are all factors in how your tires will wear. By rotating the tires as recommended by the vehicle manufacturers, tires wear more evenly which extends the life of the tires and ultimately saves you time and money.

- Recommended every 7,500 miles
- All tires are inspected for visible damage or abnormal wear patterns
- All tires' pressure are checked and filled to proper inflation
- All tires are rotated according to manufacturer's specifications
- All lug nuts are inspected for abnormal wear or damage
- All lug nuts are installed to the proper torque specifications

TIRE BALANCE & ROTATE \$49.99

THE BATTERY SERVICE Starting at \$59.99

- The old battery is removed.
- Your battery cable ends are inspected for damage and any corrosion is removed our battery cable ends are inspected for damage and any corrosion is removed.
- The new battery is installed according to manufacturer's specifications.
- Your vehicle is started to check for the proper operation of the new battery.

WIPER BLADE SERVICE FREE

w/ Purchase of Blades

- Recommended once a year
- Inspect all of the vehicle's old wiper blades for damage or wear
- Remove the older wiper blades and install new, premium quality blades

LIGHT REPLACEMENT

Headlight Starting at \$14.99

Stop Lamp Starting at \$14.99

Reverse Starting at \$14.99

OIL CHANGE SERVICES

Motor oil lubricates every moving part of your engine. If motor oil is not changed, gooey sludge will form in your engine, accelerating wear on all components in your engine which shortens the engine's life. The result could be hundreds of thousands of dollars in repairs.

ALL OF OUR FULL SERVICE OIL CHANGES INCLUDE:

24 Multi-point Service Inspection	Computerized Vehicle History
Up to 5 Quarts Oil	New Oil Filter
Lube Chassis	Inspect/Fill Transmission Fluid
Inspect/Fill Rear Differential Fluid	Inspect/Fill Power Steering Fluid
Inspect PCV Valve / Breather	Inspect/Fill Battery
Inspect/Fill Windshield Solvent	Inspect/Adjust Tire Pressure
Inspect/Fill Transfer Case*	Inspect/Fill Front Differential*
Check Antifreeze/Coolant	Visual Inspection of Belts and Hoses
Check Brake Fluid	Check Air Filter

Additional quarts are priced separately. All fluids meet or exceed your vehicle manufacturer's recommendations and are always disposed of in an environmentally responsible manner. Recommended every 3 months or 3,000 miles. *4WD Only.

CONVENTIONAL

MOBIL SPECIAL \$34.99

SYNTHETIC BLENDS

Improved protection versus conventional oil at a more economical price than full synthetic oil. Provides improved lubrication at very low temperatures, especially at start-up. Continues to protect engine in situations where conventional oils break down.

MOBIL SUPER 5000 \$43.99

- 5000 miles of protection.
- Contains 15% more cleaning additives than Mobil Special

MOBIL SUPER HIGH MILEAGE \$51.99

- Provides extra protection for engines with over 75,000 miles
- Swells engine gaskets to help prevent oil leaks

MOBIL SUPER SYNTHETIC \$59.99

- Protects at temperatures up to 400 degrees F.
- Proven full synthetic protection
- Outperforms conventional & synthetic-blends

FULL SYNTHETICS

Provides exceptional lubrication at very low temperatures, especially at start-up. Continues to protect engine in situations where conventional oils break down. Increases horsepower

MOBIL 1 \$72.99

- Protects at temperatures up to 500 degrees F
- Protects for maximum oil-change intervals

MOBIL 1 HIGH MILEAGE \$79.99

- Advanced Full-synthetic protection for engines with more than 75,000 miles
- Extra anti-wear additive
- Seal conditioner helps prevent leaks and reduces oil consumption

MOBIL 1 EXTENDED PERFORMANCE \$82.99

- Performance guaranteed protection for up to 15,000 miles
- Extends engine life

MOBIL 1 ADVANCED FUEL ECONOMY \$82.99

- Up to 2% improved fuel economy

At Mobil 1 Lube Express, we stock a complete line of engine oils. We have the correct weight oil for your vehicle.

EXTENDED PERFORMANCE FILTERS

MOBIL 1 EXTENDED PERFORMANCE OIL FILTER Starting at \$10.99

- Holds double the contaminants versus the leading brand, with 28.0 grams of total capacity
- Withstands 9 times the normal system operating pressure, for exceptional protection up to 615PSI
- Prevents dry starts by eliminating internal leakage during shutdown through the use of a silicone anti-drain back valve.

DIESEL

Up to 10 Quarts of Oil.
#1 selling brand of oil in truckstops across America!

MOBIL DELVAC 1300 \$79.99

- Newly reformulated, Now EXCEEDS the new requirements of the API CJ-4 Category and major builders

MOBIL 1 TURBO DIESEL SYNTHETIC \$139.99

- Exceptional resistance to viscosity breakdown to provide outstanding wear protection
- Superb soot handling performance to keep engines clean
- Outstanding TBN reserves to provide extended drain capability
- API SM/SL gasoline performance for gasoline engines (mixed fleet applications)

DIESEL EXHAUST FLUID

BlueDef \$3.99 per quart

- Highest Purity Synthetic
- Used in selective catalytic reduction systems (SCR)

SERVICES

TRANSMISSION SERVICE Starting at \$79.99

The biggest enemy of an automatic transmission is the heat. Transmission fluid that is changed at recommended intervals lubricates clutch plates, and contains fresh detergents to keep the transmission clean and operating properly.

- Should be serviced according to manufacturer's recommended mileage interval
- 100% of your old fluid, dirt and contaminants are flushed from your transmission.
- Your transmission is refilled with premium transmission fluid

Automatic Transmission Service \$119.99

CVT Transmission Service \$141.99

Manual Transmission Service \$79.99

DIFFERENTIAL SERVICES Starting at \$49.99

Whether front, rear or all-wheel drive, your car's metal ring and pinion gears are meshing against each other every time your wheels rotate. To ensure that these expensive metal components are well protected, it's important to have the differential fluid checked and changed at recommended intervals.

- Should be serviced according to manufacturer's recommended mileage interval
- All existing fluid, dirt and contaminants are removed from your rear differential
- All drain and fill plugs are inspected for damage
- Your rear differential is refilled with a premium gear oil (AWD & 4WD Differential Only)
- Your transfer case is refilled with premium transfer case fluid (4WD Transfer Case Only)
- Your front differential is refilled with a premium gear oil (RWD Differential Only)

Front Differential (AWD and 4WD) Service . \$49.99

Transfer Case(4WD) Service \$49.99

Rear Differential (RWD) Service \$49.99

***Mobil 1 Synthetic Gear Oil** Add \$10.00

SERPENTINE BELT SERVICE Starting at \$79.99

The Serpentine Belt transfers power from the engine to most of your major engine components: alternator, water pump, power steering pump and air conditioner compressor. Over time, the rubber belt will become brittle and crack. If the belt breaks, you will be left stranded. So it's important to have your belts checked regularly.

- Recommended every 50,000 miles or once every 4 years
- Old serpentine belt is removed
- All belt pulleys are checked for excessive wear and/or damage
- New serpentine belt is installed and safety checked

FUEL INJECTION SERVICE Starting at \$49.99

Fuel Injection Cleaning process removes dirt and build up from the air intake system and fuel injectors. All gasoline contains contaminants that slowly build up deposits throughout your entire fuel system. A clean fuel system will improve fuel economy, acceleration and performance. It will also eliminate hard starts, hesitation and stalling.

- Recommended at 15,000 mile intervals
- 2-Step process cleans the fuel injectors, intake, emission and fuel system
- Restores and maintains original performance and fuel efficiency
- Avoids expensive injector repairs
- Fixes faulty fuel gauge sensor readings

Electronic Fuel Injection \$119.95

Air Induction \$119.95

Throttle Body Service \$49.95

Combo Fuel/Air Induction Service \$119.95

***Premium Fuel System Cleaner Add On** ... \$10.00

AC SERVICE EVACUATION & RECHARGE Starting at \$59.99

- Inspect air conditioning compressor drive belt for cracks or damage
- Inspect accessible components for leaks or damage
- Check the operation of the air conditioning compressor and other air conditioning components
- Evacuate refrigerant from the system
- Vacuum test the system
- Recharge the air conditioning system using the appropriate refrigerant to the system capacity according to the vehicle manufactures specifications.
- Add dye & PAG oil as required
- Freon (not included)
